

40MM LESS-LETHAL AMMUNITION TRAINING ROUNDS

S-1060 TR / S-1090 RTR 50 / S-1090 RTR 250

The Blunt Impact Projectile (BIP) has a clear competitive advantage over other less-lethal kinetic energy ammunitions.

SDI's disruptive technologies can be used for both short and long distances with a greater level of safety, accuracy and reliability than competing products.

The BIP TR Single-Use Training Rounds and RTR Reloadable Training Kits simulate the ballistics of the original BIP, allowing for training and certification with a lower cost per round.

As training is an important part of the effective use of the BIP, these rounds have been designed as a training mechanism to help enforce compliance and order.

SDI's Training Rounds and Kits allow for realistic training by closely simulating the flight trajectory of SDI's BIP and Payload Impact Munitions. SDI is the only less-lethal company that offers a specific training round that perfectly emulates its operational round from a weight and firing specification. The cost per shot is lowest in the industry and retails for less than \$5 per shot. These are for training purposes only and must not be used for operational deployment or purposes.

Reloadable Training Kit Components

50-Shot Kits include:

- 10 re-usable projectile heads
- 50 cartridge casings (M212), complete with propelling charges
- 50 O-rings
- 1 aluminum fixture for reloading
- Warning sheet

250-Shot Kits include:

- 250-Shot Kits include:
- 50 re-usable projectile heads
- 250 cartridge casings (M212), complete with propelling charges
- 250 O-rings
- 2 aluminum fixtures for reloading
- Warning sheet

The kits come with preloaded M212 casings and a desktop aluminum fixture

Do not use SDI Training Rounds against human nor animal targets, as serious injury or death will occur.

These rounds are only intended to be used for instructional purposes on training targets approved and designed to absorb blunt trauma.

For additional information (safety data sheets, live fire demonstrations, product quotes, etc.), please contact your local SDI sales representative.
